SG
SNOWPLOW

CONVERT YOUR SG MACHINE INTO A VERSATILE SNOWPLOW

Get the most out of your investment in the winter by transforming your spreader/sprayer into a snowplow. Clear sidewalks, parking lots, and other areas with ease. Plus, using your Steel Green machine's hopper, you can spread salt across those areas, too. When the snow season ends, you can quickly uninstall the plow and start making applications.

FEATURES

- The SG Snowplow's poly blade is lightweight, strong, and resists sticking snow.
- Its rubber cutting edge clears snow without damaging pathways or turf.
- The plow's angle, down pressure, lift, and float are easily controlled with a single joystick valve.
- The stainless steel frame and undercarriage resist corrosion caused by salt and liquid de-icer.
- The kit's included LED light bar will help you see where you're going, whether it's dark, snowy, or both.
- Maximize your machine's salt-spreading capacity by carrying 120-220 pounds of granular salt in the hopper, plus an additional 50 pounds in each side tray, providing ample coverage.

SG36/SG42 SNOWPLOW KIT

The kit includes the plow, rear snow tires, rear wheel spacers, smaller front tires (required to allow room for hydraulic lift kit), LED light bar, and hydraulic hoses with flat face quick attach couplers.

SG46/SG52 SNOWPLOW KIT

The kit includes the plow, rear snow tires, LED light bar, and hydraulic hoses with flat face quick attach couplers.

Note: The Hydraulic Lift Kit (sold separately) must be installed to operate this attachment.
